Seatwork # 6.1	
Title **FUNCTIONS**	
Course Code: CPE 007	**Program: Computer Engineering**
Course Title: Programming Logic and Design	**Date Performed: October 13, 2026**
Section: 11S2	**Date Submitted: October 13, 2026**
Name: Torralba, Blizhel	**Instructor: Noel Jason Lusung**

1. Objective(s)

This activity aims to develop programming skills using functions.

2. Intended Learning Outcomes

The students should be able to:
2.1 Create a program in C++ using functions with its parameters and arguments.

3. Materials and Equipment

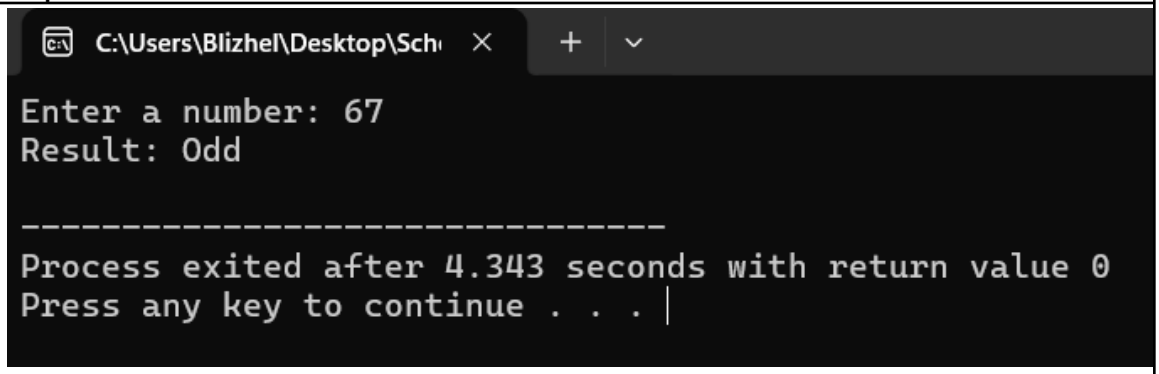

Internet connection
Personal Computer

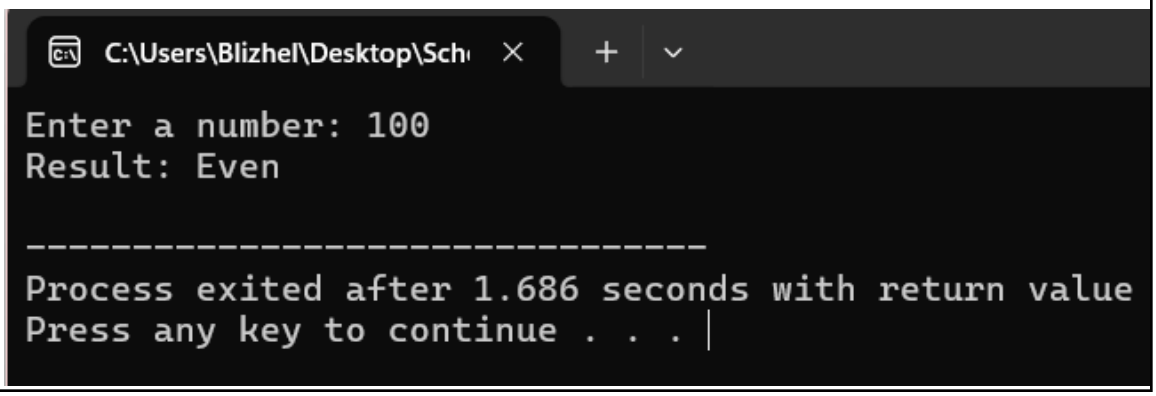

4. Procedure

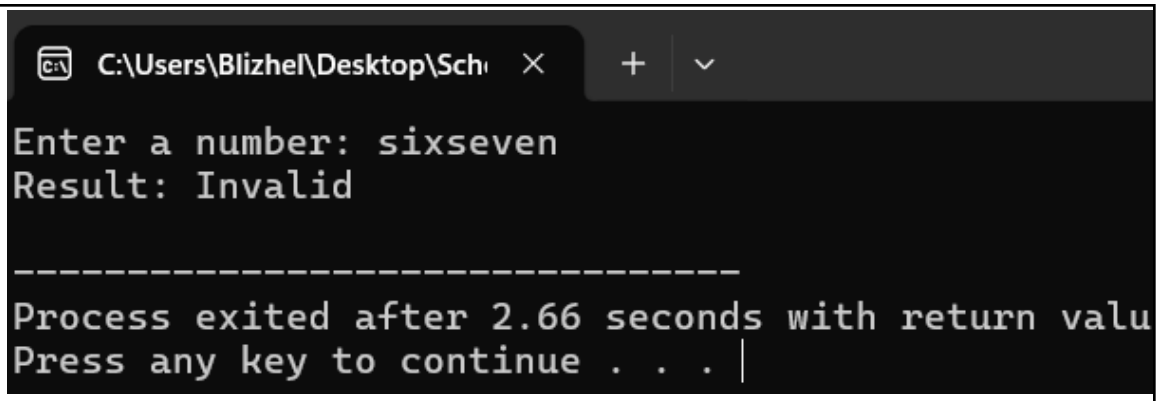

1. 1. Create a program in C++ that will choose if the number is even, odd or invalid. Use functions in the program.
2. 2. Create a program in C++ that will convert a string with LOWER CASES into ALL UPPER CASES using functions.

5. Output

1.

```
#include <iostream>
using namespace std;

// checks if the number is even or odd
string checkNumber (int number) {
	if (number % 2 == 0) {
		return "Even";
	} else {
		return "Odd";
	}
}

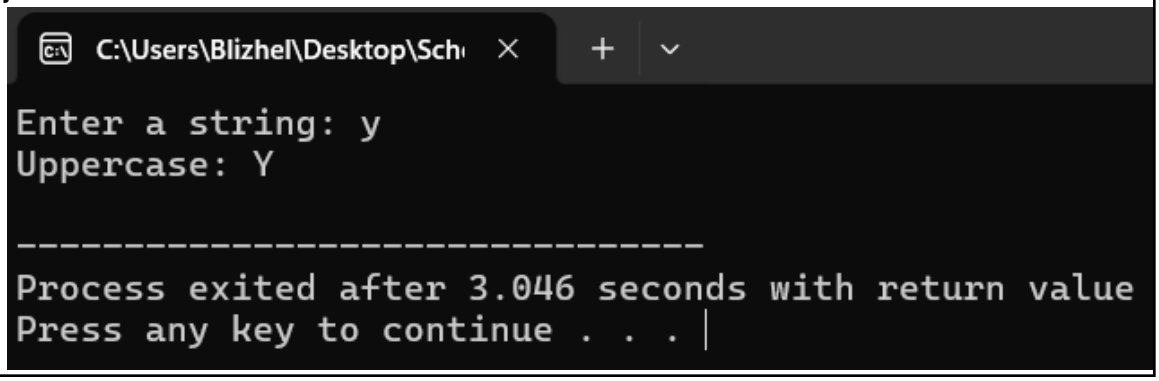

int main () {
	int number; // stores the number that the user inputs

	cout << "Enter a number: ";
	cin >> number;

	// (cin.fail()) is true if the input is invalid like a letter
	if (cin.fail()) {
		cout << "Result: Invalid" << endl;
	} else {
		// if input is valid, call function and print the result
		cout << "Result: " << checkNumber (number) << endl;
	}

	return 0;
}
```

2.

```
#include <iostream>
#include <string>
using namespace std;

// converts lowercase letters into uppercase
string toUpperCase (string text) {
	for (int i = 0; i < text.length(); i++) {
		text [i] = toupper (text[i]);
	}
	return text;
}

int main () {
	string text; // stores the text the user inputs

	cout << "Enter a string: ";
	getline (cin, text);
	cout << "Uppercase: " << toUpperCase (text) << endl;

	return 0;
}
```

6. Conclusion

In this activity I created a program that uses functions to make code easier to organize.
